## The Sunscreens That Dermatologists Wear Every Day

"I wear **Elta MD UV Clear** on my face and neck daily. Over it, I apply **Colorescience Sunforgettable Primer**, a tinted, moisturizing product that I use instead of foundation. I always keep Colorescience Sunforgettable Mineral Sunscreen in my bag so I can reapply SPF over makeup during the day.

If I'm playing sports, swimming, walking around outdoors or even sitting in a stadium in a sunny climate, I instead use **Blue Lizard Sport** for both my face and my body—it contains physical and chemical sunscreens in a very water-resistant base. Then I apply **Headhunter Warpaint**, a surfer preferred sunscreen, on the areas that get the most sun, like my forehead, nose, jawline and hands."—**Dr. Heidi Waldorf**, director of laser and cosmetic dermatology at Mount Sinai Medical Center in New York City
